

WHISTLE-BLOWERS and FREEDOM OF EXPRESSION

Because

- No one should have to experience reprisals for denouncing problematic situations in one's workplace.
- Our loyalty is first and foremost to Quebecers who receive the services we provide on a daily basis.

We demand that

- Clauses be introduced into collective agreements that would guarantee that public service employees would have the right to denounce problematic situations.
- Clauses be introduced into collective agreements that assert the right to comment and express oneself on public affairs without experiencing reprisals from the employer, in accordance with the rights protected under the Charter of human rights and freedoms.
